

PITTA PACIFYING DIETETICS (Correct food to reduce Pitta Dosha):

"Food is Medicine and Medicine is Food"

The primary consideration in *Ayurveda* when selecting food and herbs is in recognising taste. There are six tastes; three of which reduce a *Dosha*, and three of which increase that same *Dosha*. Tastes that increase *Pitta* are pungent (spicy and oily), salty, and sour. The tastes that reduce *Pitta* are bitter, sweet, and astringent. Eat herbs and food that contain more of these three tastes. Food items on the list below have been pre-selected with this primary consideration in mind. Please make sure you select food items from the list. What is not on the list you should avoid eating.

Ideal cooking styles for *Pitta* people include Western, Indian (mild), and Chinese (mild). Take more cool and raw foods in hot weather and stick to a mainly vegetarian diet. Warm food is suitable in cold weather. Avoid alcohol and red meat, also fried and fast foods. Cooling spices are good. Garlic is to be avoided.

Pitta people should take food that is not too hot in temperature or cooked with too much oil, salt, or hot spices. Meals should not be consumed when angry, irritable or upset. Moderation in all things is important.

Remember the golden rules in regard to food; eat only when hungry; eat small meals; eat your last meal at least four hours before bedtime; and eat food chosen from the food list. If you are hungry before bed then take suitable fruits only.

FRUITS	VEGETABLES	VEGETABLES continued
Generally most sweet fruits, avoid sour	In general sweet and bitter vegetables	In general sweet and bitter vegetables
Apples (sweet)	Acorn squash	Onions (cooked and sweet)
Applesauce	Artichoke	Parsley
